2009 HOLIDAY GIFT GUIDE

Television Listening Systems

TV Ears 2.3 - The TV Ears 2.3 system covers 600 square feet of space and works with Plasma and LCD flat screen TVs and in the presence of fluorescent lights. TV Ears patented technology includes a revolutionary noise reduction ear tip originally developed for US Air Force pilots and is not found in any other commercially available wireless TV headset. The patented self molding TV Ears Tips creates an acoustically sealed chamber with the ear that reduces room noise and provides unparalleled comfort, cleanliness, and clarity so that television dialog is clear and understandable.

The lightweight 1.6 ounces ergonomically designed under the chin wireless headset maximizes comfort. It has a convenient volume and tone controls with 120 decibels of power making it strong enough for people with hearing loss. The TV Ears transmitter easily attaches to your television set, satellite box, or cable box and charges the headset within one hour. While the TV Ears are in use the television volume can be lowered or muted without affecting the TV Ears headset volume. Manufacturer's 90-day warranty.

SKU: OTAD03060 | MSRP: $99.95

Sennheiser Set 830 - The Set 830 infrared stereo TV assistive listening system enables assistive listening anywhere in the room without the need for cables and without disturbing others. Directly connectable to a TV, hi-fi system or radio, the Set 830 guarantees outstanding sound quality, which, for example, thanks to treble emphasis, can be customized to the listener's hearing. What's more, the receiver is extremely lightweight and, with its perfect-fitting ear cushions, offers maximum comfort when worn. Ergonomic controls and visual signals for the individual control processes mean that operation of the Set 830-TV couldn't be easier. This unit is easy to set up and operate.

With its infrared transmission it offers cordless mobility of up to 40ft within the room. The set 830 features a first class customized stereo sound. It has three selectable hearing settings on the transmitter, large ergonomic volume control on the receiver and balance control for setting left/right volume on the receiver. The set 830 takes a BA300 lithium polymer battery that lasts for up to 12 hours of continuous play on a 3 hour charge battery is included. It also has an integrated charging compartment in transmitter for spare battery which can be purchased separately. This unit comes with two extra pairs of replacement ear cushions and a power supply with national and international adapters. Manufacturer's two year warranty. SKU: OTAD03139 | MSRP: $249.95

Sennheiser Set 820 - The Sennheiser Set 820 is easy to use with a comfortable, intuitive and ergonomic design. With roughly a 100 foot range, Sennheiser Set 820 users can leave the room while still being able to listen to a TV program or music. The system is enhanced with radio frequency (RF) technology for a larger coverage area, so users won't need to worry about missing a word of the program or song. It consists of an 820 RF stereo transmitter and receiver with automatic frequency tuning. The 820 RF stereo receiver has a large, easy-to-use volume control dial. Transmitter quick charges headset with an additional charging compartment for a spare headset battery (sold separately). Battery has a 4 hour quick charge feature with approximately four hours of operation per charge. Enjoy the 820 experience immediately with simple connection to almost any television. Manufacturer's two year warranty.

SKU: OTAD03051 | MSRP: $279.95

Sennheiser Set 900 - The Set 900 system lets you enjoy sound no matter what you are doing. If you are in a theater or a concert hall equipped with infrared transmission, you can adjust the volume at the receiver to suit your individual taste – allowing you to enjoy the event in optimum sound quality. At home you can connect your Set 900 to your TV or hi-fi system. The cordless listening system guarantees you excellent sound that can be, for example, individually treble-emphasized. With its separately changeable microphone amplification the receiver is just like reading glasses for your ears: speech becomes more understandable, making conversation easier. The activated microphones also improve your ability to perceive ambient noises such as the ringing of a telephone while watching TV.

The set 900 is easy to connect and use. It has an excellent stereo sound that's individually adjustable. It offers three selectable hearing settings on the transmitter: Its Infrared audio transmission gives you cordless mobility of up to 40 ft. within a room.

Two microphones settings on the receiver pick up and amplify surrounding noise allowing the user to hear ambient sounds such as the phone ringing whilst watching TV. It has a foldable receiver and supplied carrying case that make it easy for transportation. Amplified stereo sound when you are out and about and in rooms equipped with infrared technology (e.g. theater). Large, ergonomic volume control and balance control on the receiver, and precisely fitting, flexible ear cushions ensure high wearing comfort. The receiver has an automatic on/off function and can be placed into the transmitter's charging compartment either way round. The set 900 takes a BA300 lithium polymer battery that lasts for up to 12 hours of continuous play on a 3 hour charge battery is included. Two year manufacturers warranty. SKU: OTAD03140 | MSRP: $349.95

Amplified Telephones

Captel - Simple and easy, the CAPTEL works like any other telephone with one important addition: it displays every word the caller says throughout the conversation. CAPTEL users can listen to the caller while reading the written captions on the Caption Telephone's bright display window. Manufacturer's One year warranty.

* Please note: The user must subscribe to high-speed internet access to use this phone service.

SKU: OTAD03138 | MSRP $99.00

ClearSounds CSC600 - The CSC600 combines superb design, ergonomics and functionality with the most powerful amplification and tone management technology available. The freedom to connect is yours. The handset gives you 50dB of amplification with a full range of tone control. This phone offers outgoing speech amplification of 12dB. It is equipped with speakerphone, Caller ID* and call waiting. This phone has six programmable memory keys, a backlit keypad and a large backlit angle-adjustable LCD display. And for this who have a hard time hearing the phone ring this telephone offers a 95db adjustable ringer. Manufacturer's one year warranty.

* Note: Use of Caller ID requires subscriptions to Caller ID Service.

SKU: OTAD03120 | MSRP $149.95

ClearSounds A300 - The Clearsounds A300 DECT 6.0 cordless phone with sound boost features a digital answering machine, large print caller ID and speakerphone in the handset. Handset amplifies 25dB and the phone has an 85dB adjustable loud ringer. The DECT 6.0 feature allows for interference-free cordless transmission and crystal clear sound quality. The speakerphone in handset allows you to speak and listen hands-free from the cordless handset. The answering machine allows for 15 minutes of digital recording time, audible message alert and the ability to record messages for others or reminders for yourself. Manufacturer's one year warranty.

Personal Listening Systems

Pocketalker Ultra - Improve your life with the new Pocketalker Ultra. The Pocketalker Ultra amplifies sounds closest to the listener while reducing background noise. The Pocketalker Ultra features a lightweight, ergonomic design for portability and ease of use. Finger tip adjustable volume control allows you to quickly adjust to your listening environment – whether your hearing loss is low frequency or high frequency sounds. The Pocketalker Ultra comes with a choice of headset: wide range earphones, dual mini earbuds, single ear buds, or standard headset. Neck loop is available for an additional charge. Includes 2 AAA batteries, 12 foot listening cord, belt clip case. Manufacturer's five year warranty.

SKU: OTAD03017 | MSRP: $149.95

Comfort Contego - Comfort Audio's Comfort Contego is a wireless, digital, secure high-definition FM sound communication system for users with a telecoil equipped hearing aid. This version includes headphones and earbuds. Achieve up to approximately 40dB amplification at 1kHz. The Contego is the only wireless system that transmits high-definition digital sound over secure channels. This feature makes it a good option for those who desire a secure communication system that cannot be eavesdropped electronically (courtrooms, business, government offices, etc.). The flexibility of this system allows an unlimited number of additional receivers to be used with one transmitter (additional receivers available separately), making this an ideal solution for guided tours, classrooms, courtrooms, etc. Both the transmitter and the receiver have built-in microphones that can be set for omnidirectional or directional depending on the environment. Comfort Contego is a practical solution for the work environment, such as in meetings, groups, seminars or lectures. At home, the system can be used at the dining table, while watching TV or with other sound sources. While out and about (in restaurants, the car, stores, etc.), the system helps reduce background noise to focus on desired sounds. The receiver itself may also be used as a standalone personal listener. Working range is approximately 72 feet depending on the type of environment you're in. It can achieve up to 16 hours of use (under normal conditions) after four hours of recharging. The Contego uses Li-Ion rechargeable batteries. Manufacturers two year warranty.

SKU: OTA03066 | MSRP: $899.95

Lifetone HL™ Bedside Fire Alarm and Clock - Standard fire alarms may not wake up people with hearing loss. The first of its kind, the Lifetone HL™ Bedside Fire Alarm and Clock uses a 520 Hz square-wave sound pattern, proven by the Fire Protection Research Foundation, to be more effective at alerting and awakening people with hearing loss, seniors, children and heavy sleepers than standard fire alarms. The Lifetone HL™ is both a state-of-art fire alarm and an attractive and easy-to-use alarm clock. The patented Lifetone HL™ sensor listens for your existing smoke alarms and then broadcasts its low frequency, 520 Hz square wave sound pattern. Be protected! The Lifetone HL™ helps ensure a life-saving environment for you and the ones you love. This fire alarm works with your current smoke alarms. No new alarms are required. Battery backup lasts 7 days or more while providing emergency alarm signals. Alerts to AC power loss and low or no battery and to unplugged or improperly connected bed shaker. Manufacturer's two year warranty.

SKU: OTAD03066 | MSRP $179.95

Sonic Boom Alarm Clock with Bed Shaker - The Sonic Boom Alarm Clock wakes even the deepest sleepers. This alarm clock is very easy to see with a large, bright green LED display, adjustable time display, volume and tone control allow the most effective audio alert specifically for you. Wake up to any combination of loud pulsating audio alarm, flashing lights, or attach vibrating bed shaker. Alarm compatible with Sonic Alert's complete line of signaling products such as the telephone, doorbell, and baby cry alert devices. Manufacturer's five year limited warranty.
